# Increase in the resources allocated to the liquidity contract with Rothschild & Co Global Markets Solutions (Europe) SA

Roubaix, November 10, 2026 – OVHcloud (Euronext Paris: OVH) has today signed an amendment to the liquidity contract entered into with Rothschild & Co Global Markets Solutions (Europe) SA on January 18, 2022, in accordance with the provisions of Regulation (EU) No. 596/2014 of the European Parliament and of the Council of April 16, 2014, Commission Delegated Regulation (EU) 2016/908 of February 26, 2016, Articles L. 225-209 et seq. of the French Commercial Code, AMF Decision No. 2018-01 of July 2, 2018 (the "AMF Decision") and the provisions referred to therein.

Under this amendment, the amount allocated to the liquidity account has been increased from EUR 5,000,000 (five million euros) to EUR 9,000,000 (nine million euros). This increase is intended to adapt the resources of the contract to the growth in trading volumes of the OVH share.

The execution of the liquidity contract may be suspended under the conditions set out in Article 5 of the AMF Decision. It may also be suspended at OVHcloud's request for technical reasons, such as the counting of shares carrying voting rights ahead of a General Meeting or the counting of shares entitled to dividends prior to the ex-dividend date, for a period determined by OVHcloud.

The liquidity contract may be terminated at any time by OVHcloud or, subject to prior notice, by Rothschild & Co Global Markets Solutions (Europe) SA, in accordance with the terms of the contract.

## About OVHcloud

OVHcloud is a global player and the leading European cloud provider operating over 500,000 servers within 46 datacenters across 4 continents to reach 1.7 million customers in over 140 countries. Spearheading a trusted cloud and pioneering a sustainable cloud with the best price-performance ratio, the Group has been leveraging for over 20 years an integrated model that guarantees total control of its value chain: from the design of its servers to the construction and management of its datacenters, including the orchestration of its fiber-optic network. This unique approach enables OVHcloud to independently cover all the uses of its customers so they can seize the benefits of an environmentally conscious model with a frugal use of resources and a carbon footprint reaching the best ratios in the industry. OVHcloud now offers customers the latest-generation solutions combining performance, predictable pricing, and complete data sovereignty to support their unfettered growth.
